Header - Title
First Appearance of our annoying quiz host
Ideally Everything is contained on 1 monitor screen so that you don't really have to scroll
Welcome to the - Quiz, based on questions from Jeopardy® + Instructions (Answer 10 Questions from your chosen category to beat the quiz)
We could use a speech bubble & allow the host to instruct the user rather than text underneath.
Rather than a begin button, we could start with a category choice button.
This format would work as a start quiz after choosing a category. It also works as a next question after getting a question correct!
Begin!
